

Who Dung it and What That Says about Dinosaurs (Homeworker Helper)

Steven Spielberg's blockbuster hit Jurassic Park has been entertaining audiences since 1993. The films take on paleontological discoveries include humorous but deadly velociraptors that hunt in packs and friendly discussions on the ethics of resurrecting what nature has killed. The relatable characters and the fast-paced storyline, based on Michael Crichton's book of the same title, have immortalized the film. However, the scientific inaccuracies in the movie have become a part of mainstream culture along with it. Some of the misconceptions in the movie include Spielberg's depiction of coprolites, or fossilized feces. An understanding of the scientific facts about ancient excrement--including what a coprolite is, its composition, and its preservation--demonstrate the diet and environment of dinosaurs, providing a case study for how science is presented in popular culture and the media. If you want to learn more about coprolite, dinosaurs, or Jurassic Park inaccuracies, then check out Williams' brief essay today! *All essays published through Homeworker Helper LLC and Writers Block Publishing have been published as they were submitted for classes. Grammatical errors may be present to reflect the proper grade of the submitted dissertation. The viewpoints presented in each essay do not necessarily reflect those of Homeworker Helper LLC. It is our hope that such essays will assist fellow students, in brainstorming for Film and English composition courses. Enjoy! *Note: The essays submitted to the aforementioned groups were written for the sole purpose of providing students with critical thinking, and give such students ideas of what to write about. However, these essays are subject to the ownership of each author, Homeworker Helper LLC, and Writers Block Publishing. Please do not plagiarize. These essays have already been used in classes and submitted to the general

databases across the collegiate world. Homeworker Helper aims to promote creative and critical thinking. We hope that you enjoy this dissertation, and maintain a code of honesty and integrity. Remember this essay is a published work, and should be re-used only through proper citation, thank you.
