

Atheisms Response to Apologetics: A Refutation of 20 Common Theistic Arguments

Over the course of the history of man, the question of whether or not a god exists has been one of the most fundamental. Great thinkers from Aristotle to Aquinas have pondered this question and reached their own conclusions about the existence and nature of gods. In this work, 20 arguments commonly made by theists are broken down point by point and refuted on the basis of their validity and soundness. This work offers the reader refutations of everything from the argument from the origin of morality to the ontological argument. A mixture of logical reasoning and philosophical criticism, it attempts to offer insight into one of the biggest questions on the mind of man: Is there any evidence for a god?
