

A Voyage Toward the South Pole; Performed in the Years 1822-24

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1825 Excerpt: ...quantity of provisions, while sailing up the bay; and with these, and every other useful moveable, the crew got safe to land. It was several weeks before they knew of any ship being at the island; and in the mean time they had commenced building a small vessel out of the wreck. As they had saved but about two months provisions, these were reserved for their passage to the main; and their present support was derived from hunting only. Fortunately, it is on this maloon or island that bullocks and horses are found running wild. Of both these they shot many; but as there were 160 people to feed, the difficulty of taking a sufficient number, owing to their fleetness, caused so scanty a supply, that latterly the crew was reduced to feed on the sea H elephant, penguins, and other fishy meats, extremely offensive to a delicate stomach. They were at length relieved from their distressed situation by an American sloop, which, in passing, saw them, and went to their assistance. The ship to which this sloop was a tender, lay at West Point harbour, and I, at the same time, lay with my vessel at Port Egmont. The French commodore not knowing that any other vessel was in the islands, sent an officer in the sloop to the ship at West Point, to treat with the captain for a passage in his vessel to the main. The sloop, on her way, passed through, and anchored in Port Egmont, and the master, who was the chief mate of the ship, came on board, but did not mention the wreck, or that he had a French officer along with him: on the contrary, he cunningly prevented this officer from calling upon me, evidently for the purpose of avoiding competition in getting the passage-freight of these unfortunate people. A few days

afterwards I moved the Jane up to West Point harbour, where the Gene...
