

# Black and Asian Athletes in British Sport and Society: A Sporting Chance?

In this innovative study, Patrick Ismond provides an analysis of the issue of racism within British sport. It presents a number of theoretical positions regarding race, racism and sport, before providing a background history of the involvement of minority ethnic communities. Much detailed primary research is used to inform interesting discussions concerning racism in sport and its relationship to ethnicity, identity and notions of Englishness and Britishness. The study also includes a valuable analysis of sexism in sport, and the discrimination suffered by minority ethnic sportswomen.
