

A Book of Discovery : The History of the Worlds Exploration, from the Earliest Times to the Finding of the South Pole, Volume II (Illustrated)

This book is an illustrated version of the original A Book of Discovery by M. B. Synge. It has been obviously impossible to include all the famous names that belong to the history of exploration. Most of these explorers have been chosen for some definite new discovery, some addition to the worlds geographical knowledge, or some great feat of endurance which may serve to brace us to fresh effort as a nation famous for our seamen. English navigators have been afforded the lions share in the book, partly because they took the lions share in exploring, partly because translations of foreign travel are difficult to transcribe. Most of these stories have been taken from original sources, and most of the explorers have been allowed to tell part of their own story in their own words.
