

# Handbook of In Vitro Fertilization

Handbook of In Vitro Fertilization discusses new technologies in the field and presents detailed practical procedures to facilitate the application of these techniques. Topics covered include endocrine control, gamete biology and preparation for IVF, fertilization in vitro, sperm microinjection, embryo culture and development, embryo biopsy, genetic and chromosomal analysis, embryo metabolism and viability, cryopreservation, and electron microscopy. The book is a useful text/reference for students, clinicians, and researchers in biology, embryology, and developmental and reproductive biology.
