

Coastal and Marine Hazards, Risks, and Disasters (Hazards and Disasters)

Sea and Ocean Hazards, Risks and Disasters provides a scientific approach to those hazards and disasters related to the Earth's coasts and oceans. This is the first book to integrate scientific, social, and economic issues related to disasters such as hazard identification, risk analysis, and planning, relevant hazard process mechanics, discussions of preparedness, response, and recovery, and the economics of loss and remediation. Throughout the book case studies are presented of historically relevant hazards and disasters as well as the many recent catastrophes. Contains contributions from experts in the field selected by a world-renowned editorial board. Cutting-edge discussion of natural hazard topics that affect the lives and livelihoods of millions of humans worldwide. Numerous full-color tables, GIS maps, diagrams, illustrations, and photographs of hazardous processes in action will be included.
