

# Basic Concept of Recombinant DNA Technology

Brief of the Book It will not be out of place to mention here how and when this book was born. The entire book was written in the early hours (between 2AM to 6AM, when the world around is fast asleep), during which period I carry out my intellectual activities. After a sound sleep, a fresh mind packed with creative ideas and innovative thoughts, has largely helped me to write this book in a novel and unique way. Truly, each page of this book was conceived in darkness and born at day break.
