

Mind, Life and Universe: Conversations With Great Scientists of Our Time (Sciencewriters)

Through Punset's skillful questions, readers meet one scientist who spends her waking hours to assure the freedom of African primates, another passionate about his idea that his wife's choice of husband was determined when she was a fetus, and another who explains the evidence for more than the standard four dimensions of length, width, height, and time. Captivating conversations with such science luminaries as Richard Dawkins, Sheldon Glashow, Jane Goodall, James E. Lovelock, Lisa Randall, Robert Sapolski, Oliver Sacks, and E.O. Wilson, the editors reveal a unique, hidden world of intellectual interest, verve, and humor. LYNN MARGULIS is Distinguished University Professor in the Department of Geosciences at the University of Massachusetts, Amherst. Her most recent book is *Luminous Fish: Tales of Science and Love*. EDUARDO PUNSET is the director and host of *Redes*, a weekly popular-science TV show broadcast throughout the Spanish-speaking world, and author of *The Happiness Trip*, a number-one bestseller in Spain. DAVID SUZUKI, Ph.D., an award-winning geneticist, author, environmentalist, and educator, has created more than 150 science programs for CBC television.
