

Fifty-Fifty: A Dating Guide for Suddenly Single, Fifty-Somethings

For many of us suddenly-single, fifty-somethings, dating after many years of being half of a couple is at best a bewildering adventure. Fifty-Fifty was written by a fifty-something year old man and a fifty-something year old woman who themselves re-entered the dating world and learned - often the hard way - how to navigate its vaguely familiar but largely reconstructed highways and byways. For anyone over fifty who is newly single or who wants to more fully enjoy the experience of being fifty, single, and much wiser this time around, this book is a must read. The authors sometimes humorous, sometimes eye-opening dating experiences, serve to illustrate their practical, yet insightful, guidance on how to survive and thrive as a fifty-something single in the social scene we call dating.
