Dichotomies for Dyads: A Handbook for Recognizing and Resolving Personality Conflicts in Relationships is a break from the letter codes and memorization that are the foundation of personality books. Most of the self-help books written concerning Jungian or Myers/Briggs personality type theory require knowledge of the theory itself and the jargon that surrounds its use and understanding. This text frees the individual to learn about themselves and others using the Dichotomies of psychological type, without the need to memorize special language. Written for the individual with no background in personality theory, this text contains clear language that can be readily applied to any Dyad. The reader will quickly gain an understanding of current and past personality based conflicts that will help them to develop a new appreciation for strained relationships.
