

USDA Information Management: Extensive Improvements Needed in Managing Information Technology Investments

The BiblioGov Project is an effort to expand awareness of the public documents and records of the U.S. Government via print publications. In broadening the public understanding of government and its work, an enlightened democracy can grow and prosper. Ranging from historic Congressional Bills to the most recent Budget of the United States Government, the BiblioGov Project spans a wealth of government information. These works are now made available through an environmentally friendly, print-on-demand basis, using only what is necessary to meet the required demands of an interested public. We invite you to learn of the records of the U.S. Government, heightening the knowledge and debate that can lead from such publications.

information management: Extensive improvements needed in managing information technology investments
(Publication No. GAO/T-AIMD-97-90 **USDA Agroforestry Strategic Framework, Fiscal Year 20112016** Dec 6,
2016 To accomplish this, we have made historic investments in rural reporting: information technology and financial
management. The material weakness for financial management is due to improvements needed in accounting and
achievable standard of excellence in managing taxpayers dollars.
