

On a quest for the perfect decision: 25 inspirational and motivational stories for my Younger Self on how to take smart shortcuts in life to achieve fast and groundbreaking success

What makes someone leave home at the age of 16 to move to another country all by himself? What drives a person to pursue a professional kitesurfing career even though there is no sea where he is from? Why would someone study 6 years of medicine, just to not work as a medical doctor after graduation? How did the same person go from complete bankruptcy to financial independence in just a few years by moving to Asia? Julian, the author of the book, was asked these and many more questions throughout his entire life. Many of the answers did not make any sense at the time when he took the decision but make absolute sense looking backwards. The beautiful part of these stories he has around his answers is that anyone can not only relate to them, but moreover draw important conclusions for his or her own life. Julians thought processes are NOT rocket science. At the end, there are no good or bad decisions in life - only decisions that you make or dont make. Sometimes someone (you?) just need a little bit of reassurance that you are on the right track. If you: Need the extra motivation to step out of your comfort zone and have personal growth (maybe you want to move abroad or start a professional sports career, or change jobs?)
