

Education Law: A Problem-based Approach

Education Law: A Problem-Based Approach offers a problem based approach to teaching education law. The book covers both the standard education law topics and cutting-edge topics such as the Internet, electronic speech, discipline for off-campus behavior, cyber-bullying, strip searches, and various issues regarding NCLB and education reform. The book also provides a guided, hands-on approach that gives students an opportunity to go outside of the text and gather information about how certain aspects of education law work in the real world and in their own states.
