

Flipping Burgers to Flipping Millions: A Guide to Financial Freedom Whether You Have Your Dream Job, Own Your Own Business, or Just Started Your First Job

An easy-to-read guide to the four stages of a successful financial life Bernard Kelly started his professional life cooking French fries at McDonalds. While his first paychecks were modest, he hoped that the small amounts he set aside from each would one day lead to the financial freedom he desired. A few short years later, Kelly's work ethic and dedication have fueled his rise from fry cook to Operations Consultant at McDonalds. At the same time, those early savings have grown into the kind of personal wealth many of us dream of achieving one day. In *Flipping Burgers to Flipping Millions*, Kelly shares the easy-to-understand principles at the heart of his professional and financial success influenced by his experience working for the most successful restaurant business in the world and gives you a game plan for how to use them in your own life. Are you just starting your career? Perfect. Kelly will introduce you to the four stages of a successful financial life: Right Now, Quality of Life, Retirement, and Legacy and explain how to navigate them. Starting a little bit later? That's OK too. Kelly will help you figure out how to get back on track on your path toward financial security. Presented in an engaging and jargon-free voice, this book will capture your imagination, change the way you think about money, and show you that financial freedom is possible not just for other people, but for you.
