

The 100 Best Stocks to Own for Under \$25

If its not written by Walden, your stock pick book isnt the real thing. Consider the fate of Waldens stock picks from his first edition in less than a years time. Fifteen picks doubled. The top stock pick gained 225%. And one company, Newport Corp., realized a 1,180% gain! Gene Walden updates the hugely successful The 100 Best Stocks to Own for Under \$25 to bring even more top-quality, bargain-priced companies to the attention of both seasoned and cash-strapped investors. Although more risky than the blue chips Walden profiles in The 100 Best Stocks to Own in America, the companies and stocks for under \$25 are put through Waldens battery of tests based on stringent criteria. He evaluates and gives points to companies based on: *Four-year earnings growth *Four-year revenue growth *Three-year stock growth *Four-year consistency of earnings and revenue The companies included have shorter but solid track records. Each companys listing includes contact information, details about the company, discussion of the rating and points, table of points, and bar chart of stock growth. Walden discusses how to use this information as well as the risks of investing in low-priced stocks.
