I know it's hard to keep believing that it can happen for you but I'm proof that getting pregnant can happen no matter how long you've been trying! My husband and I tried to get pregnant for years. It seemed like all my friends were getting pregnant but somehow, I couldn't. There were many times that I wanted to throw in the towel and call it quits but I just couldn't give up my dream of having a baby. Desperate to increase my chances of getting pregnant, I aggressively began reading every book I could find on infertility, getting pregnant, conception and pretty much anything that could tell me how to get pregnant fast! I applied every method I learned from diligently calculating my ovulation and watching for fertility signs, having sex often and at specific times, eating foods that would boost my fertility and educating my husband on what he could do to improve our chances of conception. We continued to work these techniques over and over and after only a couple of months...it happened....my dream of getting pregnant became a reality at 37 years old! Surprisingly, shortly after that, I got pregnant again a year and a half after the birth of my first child using the same techniques!! I wrote Getting Pregnant Fast - The Essential How to Get Pregnant Fast Guide that will Turn Your Dream of Having a Baby into a Reality specifically for you. I know from experience that the information in this book will radically increase your chances of getting pregnant.
