

Using Macro Economic Data for Trading Handbook 3 (GIUP Professional Trading)

This handbook will show you how to find, understand and use macroeconomic data to help you in the actual practice of creating and evaluating trade ideas, utilising self-sourced online economic data and sound logic. This handbook will therefore enable you to build peer-beating experience, preparing for the global macro component of a bulge-bracket investment bank trading interview, by learning how to create intelligent, and evidenced, global macro trade ideas at home! Moreover, we completely avoid an academic presentation of macroeconomics (widely available and easy to find) and, instead, explain concepts in terms that a new trader will find directly relevant to their goal of being able to generate trade ideas independently (very difficult to find). GIUP Handbook 3 (Part 1 of our Using Macro-Economic Data for Trading series) provides: ?A refreshing practical introduction to macroeconomics, in terms of key data releases and their impact on the financial markets and trading. ?An introduction to the global economic calendar and data forecasts. ?A practical introduction to inflation, interest rates and central banks from a trading viewpoint, discussing how the market reacts to these concepts. ?A focus on employment indicators, specifically non-farm payrolls and average hourly earnings figures, and how a trader thinks about them, not just what they are. Given all this, GIUP provides a unique presentation that students will find stimulating, novel, and, most importantly, exceptionally useful!
