

God-Fact Or Fiction?

The Big Bang Theory is the leading explanation about how the universe began. At its simplest, it talks about the universe as we know it starting with a small singularity (the so-called God Particle), then inflating over the next 13.8 billion years to the cosmos that we know today. What exactly was it? What exactly banged? What caused the universe to come into existence? If matter, space and time are all a part of our universe, then what was there before that? Who or what caused nothing to become something? When something is above and beyond the law of the natural it becomes the supernatural. Might this point to a God or not? This book not only asks these hard to ask questions but tries to answer it; using both Science and the Bible. This book is a must-read for the reader who asks the age old question - Why am I here?
