

Throwing Rocks at the Google Bus: How Growth Became the Enemy of Prosperity

The promise and perils of the digital economy - and how we can use it to create prosperity for all. The digital economy was supposed to create a new age of prosperity for everyone. But as Facebook resells our data for billions and self-driving cars threaten to put drivers out of work, it has so far only exacerbated the gap between winners and losers. Yet the possibility of an economic Renaissance still lingers - if we seize the opportunity now. In *The Growth Trap*, Douglas Rushkoff identifies this crucial economic turning point and calls on everyone to remake the economic operating system from the inside out - to redistribute wealth and prosper along the way. With practical steps matched by incisive analysis, *The Growth Trap* offers a pragmatic, optimistic, and human-centered model for economic progress in the digital age.
