

Imagining India: Ideas For The New Century

Indian software entrepreneur Nandan Nilekani has written the definitive book about modern India. Nilekani gives us a fascinating new perspective for the twenty-first century, defying received and imported wisdom, and showing us what is really at stake in the worlds largest democracy. He reveals why Indias huge population has now become her greatest strength; how information technology is bringing the benefits of globalization; why rapid urbanization is transforming social and political life; and how we can learn from Indias difficult journey towards a single internal market. He also gets to the heart of debates about labour reform, the social security system, higher education and the role of the state. And he asks the key questions of the future: how will India as a global power avoid the mistakes of earlier development models? Will further access to the open market continue to stimulate such extraordinary growth? And how will all this affect - and be shaped by - her young people.
