

Ubiquitous and Pervasive Knowledge and Learning Management: Semantics, Social Networking and New Media to Their Full Potential

The importance of semantics has been recognized in different areas of data and information management, including better access, exchange, interoperability, integration, and analysis of data. Semantics of data is about associating meaning to data, understanding what data represents, and improving the value of data. Ubiquitous and Pervasive Knowledge and Learning Management: Semantics, Social Networking and New Media to Their Full Potential presents an alternative view to ubiquitous and pervasive knowledge, architectural frameworks, and methodological issues, and introduces some of the major techniques and tools developed in the domain of ontology building, analysis, and semantic Web. Ubiquitous and Pervasive Knowledge and Learning Management: Semantics, Social Networking and New Media to Their Full Potential contributes to the revolutionary domain of semantic Web and information systems in the following aspects: vision, methodologies, tools, and applications.

Ubiquitous and Pervasive Knowledge and Learning Management: Semantics, Social Networking and New Media to Their Full Potential presents an alternative **Ubiquitous and Pervasive Knowledge and Learning Management** innovative services has introduced new ubiquitous environments . Ubiquitous and Pervasive Knowledge and Learning Management: Semantics,. Social Semantics, Social Networking and New Media to Their Full Potential (pp. 263-292). **Ubiquitous and Pervasive Knowledge and Learning Management: - Google Books Result 2007?2?28?** Ubiquitous and Pervasive Knowledge and Learning Management: Semantics, Social Networking and New Media to Their Full Potential **Ubiquitous and Pervasive Knowledge and Learning Management** Ubiquitous and Pervasive Knowledge and Learning Management: Semantics, Social Networking and New Media to Their Full Potential by Miltiadis Lytras, **Ubiquitous and Pervasive Knowledge and Learning Management** An infrastructure for educational virtual laboratories based on Semantic Web . develop pervasive and ubiquitous learning scenarios. 3. knowledge in the form of ontologies, with a conceptual will allow to manage this resources throw a variety of .
