Learning to deal effectively with conflict and to respect disparate viewpoints is vital to building and maintaining successful relationships at work, at home, and elsewhere but where can we acquire the skills for doing so? In *The Uniting Power of Conflict*, the author reveals how people with divergent viewpoints can avoid the usual pitfalls and engage in a constructive process. I demonstrate: > How working with conflict can be transformed into a mutually beneficial process; > How engaging in this process can enrich the quality of every relationship in your life; > How the simple yet powerful rules for the Baseball Model of Conflict can level the playing field to create room for all viewpoints and positions. While not everyone enjoys sports, it is not necessary to know how to play baseball or even to have seen a game to learn the Model of Conflict. Start today with *The Uniting Power of Conflict* to transform your life and relationships.
