

Just the two of us : giving new meaning to our lives through dealing with infertility

This book is about coping with infertility. The authors went through a variety of fertility tests and treatments including IVF and ICSI. After six years they pulled the plug and decided it was time to move on and lead a life not ruled by planning around cycles, hormones and fertility attempts. They both wanted their normal lives back but found it hard to grieve over a loss that was not tangible. In this book they both talk openly about all their fertility treatments, coping strategies, adoption procedure, giving up hope of having a family, grieving process and eventually their acceptance of infertility. This book tells the story from both a female and male perspective.
