

The Cry of A Little Boy: Overcoming the Struggle

Can you imagine a little boy, five years old, living in a world full of confusion because he doesn't understand what sexuality has to do with his innocent life? He always knew he was different; how else could he explain the cruel teasing he was forced to endure at the hands of the children and adults in his community? This little boy suffered teasing as being a homosexual, and was repeatedly molested by his older brother, men as old as his father, and young boys from the neighborhood. These relentless acts of torment and molestation would eventually cause him to suffer from a sexual addiction so damning that it would ultimately bring him to the brink of destruction, almost resulting in an untimely death. Ultimately, this little boy grew to live most of his life as a homosexual. Afflictions continued to plague his life and he lost a sister and the brother who once molested him to AIDS. In an effort to define his own existence, this little boy searched his whole life for love in all the wrong people. Eventually he would trade his old life in for a new one. As a child, he was known by those in his community as a worthless little boy who would never be worthy of any good thing. However, little did they know that he would rise out of despair to become a successful productions producer in the world of entertainment. Eventually this little boy would also meet a man known all over the world, one bigger than any celebrity he'd ever come to know. Although it would be many years later, this little boy would become an adult man who finally accepted the invitation of this man who had tried to help him continually throughout his life. The invitation he would later accept was from God.
