

Intelligent BPM Systems: Impact and Opportunity

By reading this book, you'll understand how successful organizations keep up with business change, and how an adaptive, intelligent enterprise is able to navigate change. The co-authors of this important book describe various aspects and approaches with regard to impact and opportunity. Intelligent business process management is the next generation of enterprise BPM, leveraging recent technological advances to attain a degree of operational responsiveness not possible with yesterday's business process platform. Today, companies of all types want faster and better insight into their operations. This growing demand for operational intelligence has given rise to a new, smarter variety of business process management suites (BPMSs). An intelligent BPM suite provides the functionality needed to support more intelligent business operations, including real-time analytics, extensive complex event processing (CEP) and business activity monitoring (BAM) technologies and enhanced mobile, social and collaborative capabilities. Foreword by Gartner Emeritus Jim Sinur. Co-authors include industry experts Keith Swenson, Nathaniel Palmer, Robert Shapiro, Setrag Khoshafian, Charles Webster, James Taylor, Pieter van Schalkwyk, Steinar Carlsen et al
