

Manage Your Social Media in 30 Minutes a Day: Practical Social Media Strategy Series for entrepreneurs & professionals - beat the overwhelm & take control

Manage Your Social Media in 30 minutes A Day is the revised and updated edition of How to Manage Your Social Media Marketing in 30 Minutes a Day (2011). It provides fresh insights on how to overcome the sense of overwhelm and over-complexity which can affect us all and allows you to take control of your social media marketing. It is the first in a series of three titles covering social media management, this revised, updated edition contains brand new additional chapters, new management tools & exercises, and looks at the latest social media tools & strategies. Since the original edition was published, the world of social media technology has evolved with platforms such as Instagram taking the world by storm. New generation smart-phones make sharing information easier than ever before. Consumers and the public are now savvier and more sophisticated in their use of social media and interpreting marketing messages. The pressures to maintain an interactive presence have risen accordingly but knowing where to devote precious time & resources can be hard to establish. This makes the need for an effective social media strategy all the more necessary for professionals and business owners. Focused, targeted marketing is key to reduce the time-wasting, mid-directed effort, and general confusion. This new edition will help individuals and businesses keep their head above water, feel confident about social media, and achieve results. Returning to the world of social media marketing following a three year sabbatical to look after her young family, Sumi Olson is as passionate as ever to develop work-life balance for fellow entrepreneurs and professionals. As the mother of a disabled child, Sumi is keenly aware that her time and effort needs to be prioritised to achieve a healthy work-life balance.. This new edition includes the insights and the techniques she uses to ensure her time

is spent on the things that matter most to her.
