

A Manual of Nature Conservation Law

This compilation of statutory and non-statutory materials is designed to give environmental specialists a set of the essential texts in an up-to-date and easily accessible form. Carefully footnoted and cross-referenced, it is possible to see at a glance exactly which sections of UK law are currently in force, which have been repealed or amended and exactly where the amending provisions can be located. Unlike some other compilations of statutes, this volume has been prepared with immense attention to detail and great emphasis upon both the accuracy of the texts and the veracity of the supporting notes and references.
