

## Late in an Anglers Life: Essays on the Sport

Fishing is a pursuit for which writers had an affinity even before Izaak Walton; still, it is Waltons spirit that hovers over this collection of musings by well-known writer and fisherman Gordon Wickstrom. These writings use fishing as a lens through which to view and evaluate most things in life: politics, art, friendship, religion, globalization, relations between the sexes, time, and old age. The result is a book that will lift your spirits even when it tells you when it is acceptable to use live grasshoppers as bait. Wickstrom does not confine himself to philosophizing. He discusses technical matters such as equipment and techniques. He reviews the literature. He addresses sticky issues like nativism and class issues in angling. In short, he writes about all the things that matter to people who love to fish, and those people will be grateful to him for having produced a book they can read with real pleasure when not fishing.
