

The Critical Window: The State and Fate of Humanity

This book is to, about and for the most intriguing team in the Galaxy. Come take a journey through a wide array of timeless topics, as we explore and evaluate humanity like never before. Who we are, where we are, where we came from, how we fit in with the rest of nature, what we are capable of and what our purpose is. We recently rose into the critical window - the time period when a life form is intelligent enough to know all the ways their planet, star, galaxy or universe can destroy them, but not yet advanced enough to prevent, control or avoid these threats - but will we succeed in climbing up to the next level? It is entirely up to us. We are the ends and the means. Our fate depends on where we focus our thoughts, efforts and resources. Our decisions and deeds will determine our destiny.
