

The Investment Book: The Screaming Capitalist Is Back!

Following the runaway success of *The Money Book*, author, financial advisor, and newly minted spokesperson for the younger set seeking security, Kevin Cork is back with another must-read effort. *The Investment Book* is an informative and irreverent look at the world of stocks, bonds, mutual funds, and investing. Like *The Money Book*, *The Investment Book* is geared toward investors under the age of 40—men and women just starting their careers, families and investment portfolios. In-depth knowledge of foreign markets, RRSP options and eco-funds is not required. Nor is \$40,000 of disposable income. In his trademark witty style, Cork walks the reader through the process of setting up and then maintaining an investment portfolio. Beginning with an overview of various investment options, Cork goes on to explain down-to-earth strategies for combining these options into a personalized portfolio that will directly serve the reader's diverse (and possibly frivolous!) needs and goals. For readers using advisors to put their portfolios together, *The Investment Book* provides the information needed to ask the right questions and reasonably judge the answers. For those just beginning their financial journey, or for more experienced investors looking for a fresh approach, *The Investment Book* is bound to offer a good return.
