

Science: A Discovery in Comics

Explaining different scientific disciplines in clear, colorful chapters, this illustrated primer is a great way to introduce young readers to a complex topic. In her easily accessible style, Margreet de Heer visualizes science and makes it approachable for those with little knowledge of the subject. Touching a number of topics in various scientific disciplines--including math, chemistry, physics, biology, geology, and quantum theory--this work ponders questions such as Who exclaimed Eureka and why? Why did Galileo get into a fight with the Church? and What happens when you have your DNA tested? This humorous yet substantive graphic account strips the subject of unnecessary complexity, making it a perfect introduction to exploring scientific concepts.
