

# English Brain Arabic Learner: Easy Adult Comprehension of the Arabic Language

English Brain Arabic Learner exposes the simplicity of Arabic and gives the learner heart to stay in the challenge of learning the language. This book was written by a trained Global TESOL instructor after two years of practical classroom application. The methodology works. English Brain Arabic Learner is a clear and concise presentation of the Arabic language and how it can find its way into the brains of individuals whose linguistic patterns have relied solely on English. While many individuals have a desire to tackle Arabic, a good percentage of them become discouraged and convinced that the task is too difficult. The methodology is simple. It covers each component of language separately, sounds (vowels), alphabets (letters), punctuation, and pronunciation. By understanding the role each plays in Arabic, the learner can recognize and use (reading) words quicker. Many would-be Arabic learners fail to learn the basics of the language because of simple points. Many instructors push learners too hard sometimes just to memorize letters without giving them proper explanation of letter basics. They fail to show how all written language forms share a linguistic relationship. They ignore the perceived mystery associated with Arabic and they don't address the myth about it being such a complicated language to learn. Adults are perfectly capable of learning how to read and write Arabic. English Brain Arabic Learner shows how. The author explains the underpinnings of Arabic in an, easy concise way. Taalib uses a brain-centered approach for teaching adults basic comprehension of Arabic. Having spoken, read, written, and listened to English all of our lives, our conscious minds become wary of any new and unfamiliar language, not just Arabic. The book focuses on approaches adult brains can accept easily as opposed to using force to make it do something against its will.
