

Relationship Investing: Stock Market Therapy for Your Money

In Relationship Investing, expert Wall Street analyst and media personality Jeff Weiss reveals how treating the stock market like a personal relationship can remove complexity and anxiety from the equation. Weiss begins by comparing the stock market to a relationship and explains that you shouldn't jump into something like buying a house, or stocks without knowing your partner and what you're in store for. From there, Weiss discusses themes such as: the importance of communication you need to be able to read your partner, just as you need to be able to understand stock market lingo; risk management how to know when to take the next steps with your partner, or to purchase a stock; and what to do when it doesn't work out when to break it off when your partner, or sell your stocks. Weiss's words are insightful for beginning investors, yet also offer tips for those more experienced. Weiss is a highly-desired media expert and public speaker because of his shrewdness and larger-than-life personality, and with this read these characteristics shine through. The result is an enjoyable, easy-to-follow road to financial success.
