

Medium and High Energy Nuclear Physics: Calcutta, India 20-22 December 1991

This volume gives a detailed account of the current trends in the interface areas of medium and high energy nuclear physics. Stress is given to topics like chiral models, relativistic models of nuclei, quark-gluon plasma, and other reactions with non-nucleonic degrees of freedom. The articles present the state-of-the-art research in these areas and also suggest unsolved problems which will form the main thrust of future research work in nuclear physics.
