

The First Law

Energy. It defines our universe and our lives. Yet as the first law of thermodynamics makes clear, energy is never destroyed. It only changes to a different state of matter. Beyond life, there is death. But death is only the beginning as the energy of life becomes a different state of understanding and leads to revelation.

Dr. Logan Rainell confronts a deadly syndrome that threatens to consume the world. But when he begins to see auras and energy fields around the sick and healthy, he discovers a cure that may have been with us all along. A story of unconditional love, heartbreak, loss, and the wonderful lessons we uncover in our journeys through life, *The First Law* is a novel that will make you laugh, cry, ponder wisdom, and ultimately feel hope for the evolution of humanity and Earth. A visionary of fine and startling talent, Richard Ragle is a writer to watch. Intensely moving and compassionate, *The First Law* is groundbreaking; it is more than a book to read and set aside. It weaves a sunrise sky in which your soul can soar and catch fire with passion and revelation. And like a deep draught of water for the parched spirit, this is a book with the power to heal and touch lives. It did mine. It will do the same for you. ~Michelle Izmaylov, award-winning author of *The Galacteran Legacy: Galaxy Watch*
