

Social Accounting for Sustainability: Monetizing the Social Value (SpringerBriefs in Business)

This book deals with the limitations of economic and financial accounting as an appropriate instrument to reflect the real value created or destroyed by an organization. The authors present a sustainable social accounting approach that considers both the social and economic value Blended Value generated by an organization for all of its stakeholders. This approach is based on four major theories: Stakeholder Theory, Action Research, Phenomenological Perspective and Fuzzy Logic and was developed on the basis of a cost-benefit analysis.
