

OUR UNDERSTANDING OF THE UNIVERSE FROM ANCIENT TO PRESENT TIME: Science without religion is blind and Religion without science is Lame - Einstein (Part -1 }

Prof. Fred Hoyle had coined the word , BIG BANG. He along with Prof. Harmann Bondi and Prof. Thomas Gold had introduced the concept of , PERFECT COSMOLOGICAL PRINCIPLE by the name steady state theory and 5% of the observations support this principle. Finally he along with Prof J.V.narlikar had given CONTINUOUS CREATION THEORY. According to Prof. Harmann Bondi, It is 80% Big bang, 5% steady State and 15% unknown. On this ground I have introduced a new model of the universe. This new model has capable to explain all the observations of Big bang (80%), steady state observations (5%) plus unknown observations (15%) . This NEW MODEL of the universe with new scientific understanding postulated by me that supports the continuous creation theory goes by the name of HOYLE -NARLIKAR UNIVERSE. .
