

Fibronectins (Springer Series in Molecular and Cell Biology)

Fibronectins comprise a class of high molecular weight glycoproteins present both in extracellular matrices and in soluble form in body fluids. Although they have been studied for about forty years, their real significance emerged only during the past decade. Intensive research has focused on their role in platelet function, cell migration, the cytoskeleton, reticuloendothelial function, and on alterations in fibronectin distribution during development and disease. Fibronectins have emerged as glycoproteins with a very interesting set of properties generally involving adhesion of cells to cells or to extracellular material. In more recent years, the complete sequences of several fibronectin molecules and their genes were determined, the relation between structure and function was understood and much has been learned about cell surface receptors for fibronectins and other adhesive ligands. Having been at the forefront of all these exciting developments, the author has synthesized the entire field and with all the latest information at hand for the first time given it a clear perspective.

Part of the series Springer Series in Molecular Biology pp 84-112 Dessau et al, 1978a), and collagen-cell attachment protein (Klebe, 1974 Kleinman et al, **Oncogenic Transformation - Springer** Springer Series in Molecular Biology. 1990 Expression of Fibronectins by Cells in Culture Richard O. Hynes Cellular Adhesion and Cell Surface Receptors. **Fibronectins Richard O. Hynes Springer** Although this series no longer publishes new content, the published titles listed below may be still available on-line (e. g. via the Springer Book Archives) and in **Fibronectins - Google Books Result** : Fibronectins (Springer Series in Molecular and Cell Biology) (9781461279402) by Hynes, Richard O. and a great selection of similar New, Used **Fibronectins (Springer Series in Molecular and Cell Biology** Fibronectins. Part of the series Springer Series in Molecular Biology pp 349-364 role in wound healing phenomena involving several different cell types. **Download Fibronectins Springer Series in Molecular and Cell Biology** Part of the series Springer Series in Molecular Biology pp 231-248 bound up as they are with the question of the nature of the cell surface receptors for FN, **Fibronectins (Springer Series in Molecular and Cell Biology) by** Find helpful customer reviews and review ratings for Fibronectins (Springer Series in Molecular and Cell Biology) at . Read honest and unbiased **Fibronectins (Springer Series in Molecular and Cell Biology)** Part of the series Springer Series in Molecular Biology pp 113-175 Such interactions are at the core of the various biological functions in which FN participates **Receptors For Extracellular Matrix - Google Books Result** Fibronectins comprise a class of high molecular weight glycoproteins present both in extracellular matrices and in soluble form in body fluids. Although they **Fibronectins (Springer Series**

in Molecular and Cell Biology) Part of the series Springer Series in Molecular Biology pp 7-23 of the various types of fibronectin both in vivo (Chapter 3) and in tissue culture (Chapter 4). **Fibronectins Springer Series in Molecular and Cell Biology: Amazon** Jan 23, 2017 Best Price Fibronectins (Springer Series in Molecular and Cell Biology) Richard O.
