

## T.A.P.S. : Tactical Application of Practical Shooting

Recognize the void in your tactical training  
Train like you fight  
Maintain safety at all times  
Choose targets that force accountability  
Develop a series of standards  
Patrick McNamara spent twenty-two years in the United States Army in a myriad of special operations units. When he worked in the premier special missions unit, he became an impeccable marksman, shooting with accurate, lethal results and tactical effectiveness. McNamara has trained tactical applications of shooting to people of all levels of marksmanship, from varsity level soldiers, U.S. Secret Service agents and police officers who work the streets to civilians with little to no time behind the trigger. His military experience quickly taught him that there is more to tactical marksmanship than merely squeezing the trigger. Utilizing his years of experience, McNamara developed a training methodology that is safe, effective and combat relevant and encourages a continuous thought process. This methodology teaches how to maintain safety at all times and choose targets that force accountability, as well as provides courses covering several categories, including individual, collective, on line and standards. TAPS: Tactical Application of Practical Shooting: Recognize the void in your tactical training will increase the confidence and efficiency in your shooting by providing training tips and courses of fire to help you significantly improve your marksmanship. Utilize his tips and techniques and reap the benefits as you shoot.
