

Spiritual and Scientific Research on Arabic Letters and Numbers

This book is based on scientific and spiritual research on Arabic letters and numbers with reference to verses of the Holy Quran (The Sacred Book); it is not religious propaganda. Different kinds of lore came forward with Arabic letters and their numerical values, like DNA, the origin of the creation, the elements of nature, in fertilization, honey, and so on. In my research, I have tried to bring an approach between science, religion, and spirituality by working on the Arabic letters and their numerical values and by the mathematical computation of the words in the Holy Book. Even if you don't know the Arabic language, you will be able to understand what is written in this book by the way I have prepared it.
