

The Shape of Bereavement: Working through

This handbook provides an insight into the process of grief and mourning by drawing on interviews with people who have experienced bereavement. The book focuses on experience and the importance of a caring relationship in enabling a bereaved individual to move forward on their journey from trauma to recovery and renewal. Case studies based on real events and situations are used alongside psychological perspectives to show how people talk about themselves when they are actively encouraged, and consciously enabled, to share their grief.
