

The Ultimate Observer

The New Atheists tell us that science has disproven the existence of an active Creator, the type of God described in the Bible. Many believers through the years have tried to prove that God can coexist with science, but most of these attempts have suffered from a fundamental conceptual flaw. They allow the skeptics to determine the parameters of the discussion. We may not be able to reconcile the concept of an active Creator who can foretell the future and work miracles with current scientific theories, but there is absolutely no disagreement with the actual results of scientific experiments. We simply have to look at things from a different point of view. Indeed, it is possible to look at the Universe from a unique perspective that not only explains the results of our experiments in a simple and direct way, but offers us a more profound grasp of our place in this universe than we've ever had before. Created in God's image, we have the privilege of working side by side with Him in the perfecting of the world.
