

# The Winning Investment Habits of Warren Buffett & George Soros: Harness the Investment Genius of the Worlds Richest Investors

Warren Buffett, and George Soros all started with nothing. They're the world's richest investors and they built their billion-dollar fortunes solely by investing. Was it luck? Something in their genes? Connections and insider information that the average investor can't get? NO! says Mark Tier in this path-breaking book. He discovered that despite their radically different investment styles they both practice exactly the same mental habits and strategies religiously. What's more, Peter Lynch, Benjamin Graham, Sir John Templeton, Bernard Baruch, and all the other successful investors and traders he has studied and worked with follow them too. Without exception. Their mental habits and strategies fly in the face of the conventional Wall Street wisdom. For example:

- > Buffett and Soros don't diversify. When they buy they always buy as much as they can.
- > Both will tell you that making predictions about the market or the economy has virtually nothing to do with their success.
- > They're not focused on the profits they expect to make. Indeed, they're not investing for the money at all.
- > They don't believe that to make big profits you must take big risks. Indeed, they are far more focused on not losing money than on making it.
- > Their beliefs about what makes markets tick are amazingly similar and diametrically opposed to academic theories like the Efficient Market Hypothesis and the Random Walk which they both view with contempt.
- > And all those research reports that Wall Street churns out they never read them. They don't give a hoot what other people think.

In identifying the winning investment habits that led the world's richest investors to phenomenal success, Mark Tier has uncovered for the first time the habits that ALL successful investors share. What's more, every one of these winning habits is something you can easily learn yourself. And it makes no difference

whether you look for stock market bargains like Warren Buffett, trade currency futures like George Soros, invest in real estate, antiques or collectibles, use technical analysis, buy on dips or buy on breakouts, use a computerized trading system or just want to salt money away safely for a rainy day. Adopt the winning investment habits of the worlds richest investors and you too can make more money more easily than you ever thought possible. I invest in real estate, but as you indicate, the principles are the same. You provide a significant methodology for me to confidently progress. As well as being outstandingly insightful it provides several important strategies that anyone could develop.

Vance Marcollo, Australia Mark Tiers mapping of investment genius is simply masterful clean and true. What lifts his book even further above the rest, though, is his infectious delight in discovery and clarity of explanation as he hands you the attitudinal and behavioral keys to becoming the consummate investor. David Gordon, author, *Expanding Your World: Modeling the Structure of Experience* This book is based on a stunningly simple, but highly intelligent and effective idea: Analyze the methods of Buffett and Soros probably the two most successful investors of our time and see exactly why theyre so successful. Everybody talks about these guys, but its rare to find a good, thorough analysis of why theyve done so well. Tiers approach is especially valuable because Soross and Buffetts methods are often so different yet, as Tier shows, the keys to their success are amazingly similar. Great book something I rarely say about this genre. Doug Casey, editor, *International Speculator* Tier has written an excellent book. His chapter on exit strategies alone (knowing when to sell even before you buy) is worth the price of the book. Dr. Mark Skousen, editor, *Forecasts & Strategies* My interest was held throughout the whole book. It jelled very well with me and showed me some o
