

New Wine Companion

From the vine to the palate, this is a tour of the vineyards of the world, aiming to introduce the reader to the wine trade and to all aspects of the manufacture of alcoholic beverages. It begins with a brief history of the origin and spread of winemaking, followed by profiles of the principal types of wines and spirits, their methods of production and their uses. There are also suggestions for suitable foods to accompany the various wines and the book concludes with a look at the trade itself and its products as presented to the consumer. Additions to this edition include a chapter on cigars and changes to the chapters on light and sparkling wines, which include details for non-EEC countries. It is suitable for those wishing to pursue a career in the licensed trade and is the basic text for the Wine and Spirit Education Trusts Ordinary Certificate course; but it should also benefit first and second year students in wine service, catering technology and catering and hotelkeeping.
