

# Universe Design with SAP BusinessObjects BI: The Comprehensive Guide

Bend the cosmos to your will! For SAP data and non-SAP data alike, this comprehensive resource spans universe creation to universe publication. Learn to build single- and multisource data foundations and business layers and to convert UNV to UNX using the new Information Design Tool. Using step-by-step instructions and guiding screenshots, explore the important Information Design Tool features and functionalities that will put intelligent design within your grasp. \* Everything you need to know about the new Information Design Tool and UNX universes \* Explore step-by-step universe design, from connecting to different data sources, to creating data foundations, to building business layers \* Compare and convert UNV to UNX universe Information Design Tool Explore its interface and find tips to design and manage universes that fit your needs. The Semantic Layer Begin with a conversation on the fundamental role of the semantic layer and then move into the pillars of universe design: the data foundation and the business layer. Connecting to any Data Source and to SAP Systems Connect to any relational data source or OLAP cube with your universe, and make sure you're using the right parameters and access methods to retrieve enterprise data from SAP systems. Comparing the Old with the New Differentiate between universes created with the Universe Design Tool and Information Design Tool, and learn how to convert UNV to UNX. \* Semantic layer \* Information Design Tool \* Multidimensional universes \* Connections, data foundations, and business layers \* Federating data with multisource universes \* Query panels \* Publishing and retrieving universes \* Multilingual universes \* Connecting with SAP ERP, SAP NetWeaver BW, and SAP HANA
